

The Head of the department's letter:

The department of athletic games training is one of the oldest departments of the college since it has been established. And with no doubt it is the founding brick to many of the practical departments.

The department consists of four group games & three individual games; each has its concrete weight in the dept.

The department prepares the students educationally & academically to interact with the labor market in light of the quality standards as a teacher, trainer, and as a manager.

In the line with the college & university's strategy, the department sets its strategy to keep pace with global developments in the field of physical education and through modernization of academic programs and to provide an opportunity for students to learn about all the new updates in the field, as well as the use of the latest educational methods and technological means in education. In this context, the department defines the operational plans for this strategy with the beginning of each academic year along with the smaller objectives to achieve quantitative and qualitative development in the field of education, research, & community service.

Thus the department developed academic plans to achieve its goals of elevating its graduates. As part of the university's academic policy that encourages the provision of services to the government and community; to establish working relationships with governmental and no-governmental organizations. The department organized several community programs targeting key stakeholders, including programs aimed at finding effective channels of communication. The programs can consist of but not limited to conferences, seminars, workshops & training sessions along with the provision of technical consultancy and advisory services for many public and private institutions. As well as the enrollment of the

department staff & professors in the sports federations and the Olympic committee staff.

The department has also developed a research plan based on the necessity of conducting a group of research studies that address community issues linked to the dept. The department has also contributed in developing a number of programs such as the Masters Studies program. And through the enormous development and lasting prosperity of the education & evaluation projects on the level of the faculties of physical education in Egypt, the department has participated in the project of developing “student evaluation” and “exams evaluation” in the Basketball & tennis Courses.
